

Tracking wt

The innovative approach to anti-counterfeit

TRACKING wt can help to protect you against fake products and their financial effects. By recording individual pack numbers, it ensures your products are uniquely **traceable** – from individual packs to pallets and beyond.

Flexible Web-Technology:

- Can be used with a wide range of track & trace strategies, such as Italian vignettes (bollini)
- Investment is future-proof, as can be upgraded easily
- Can be integrated into existing wt systems
- Communicates with existing IT infrastructure

Highly reliable:

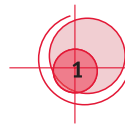

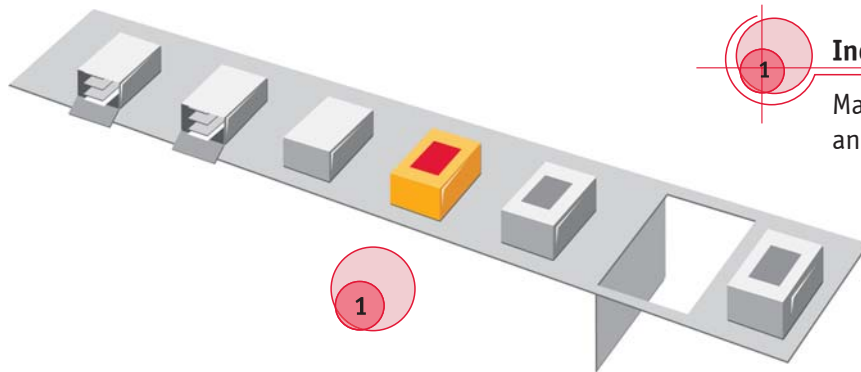

- Records data reliably, even with machine problems
- Can be corrected (manually and automatic)
- Clearly structured log reports

Outstanding in operation:

- Uses 1D and 2D barcodes
- Records data via RFID
- Reads plain text via OCR
- Can use invisible data

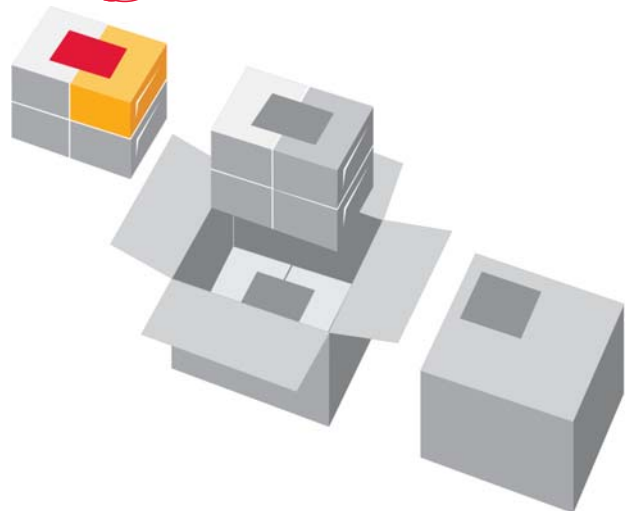

Performance of TRACKING wt

- Applies marking data as product ID, collective ID or dispatch unit ID in form of barcode (1D/2D, UV code), RFID or plain text (OCR).
- Records, saves and groups product/pack marking data (**e-Pedigree**).

Individual products

Marks single packs, such as cartons, bottles and blister packs with **product IDs**.

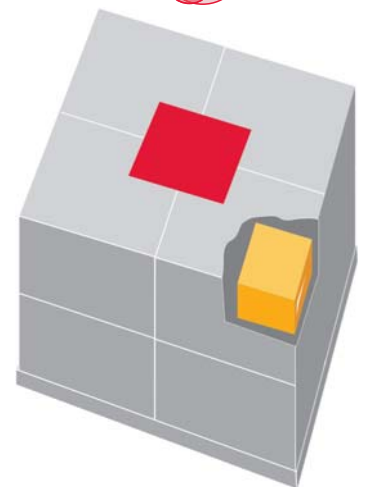

Multi-packs

Summarize the product ID s within multi-packs, such as shrink packs, multi-banded and boxed via **collective IDs**.

Complete dispatch units

Multi-packs are supplied as complete ready-to-send units, e.g. pallets, identified via **dispatch unit IDs**.
