

Stretchwrapper

Securing cartons without the heat

Omega's Stretchwrapper is a compact, packaging solution that securely wraps cartons as individual units or as bundles in a linear or stacked configuration. With **no heat tunnel required**, the Stretchwrapper occupies little floor space and consumes less energy than traditional shrinkbundlers.

You can easily adjust the amount of film stretch via the machine's touch screen interface

Lower film costs:
a stretchwrapped bundle
uses less film than a
shrinkwrapped bundle

Optional:

- Carton stacking
- 5th panel carton orienters

Available for:

- Single to multiple lanes of operation
- Speeds up to 300 cartons per minute
