

N 623 from Romaco Noack

The successful track record of the high-performance Romaco Noack N 623 intermittent motion platen machine makes it synonymous with dependability and versatility – qualities which continue to see it setting the standard in the contract packing sector and other applications that require short batches and quick changeovers. Utilising modern and user-friendly GMP-compliant technology, the

Romaco Noack N 623 blister machine is ideal for packing tablets, capsules, caplets, ampoules and vials. Furthermore, optimal usage of machine time is achieved to a combination of quick and easy adjustment, fast change-overs, total accessibility throughout the machine, large foil/film reels requiring fewer changes and electronically stored format data.

Highlights

- Processes all common thermoformable foils and films
- Standard alu forming
- Upgrade options to increase productivity: automatic feeding systems, filling inspections and ejection station, print mark registration, blister transfer for in-line operation with cartoner
- QuickAdjust – autoadjustment for coding, perforation, cutting
- Die-cutting upgrade options in waste-saving execution
- Full GMP compliance
- Easy operation and setup
- Optimised machine usage time

Technical Data

Noack N 623

Output blister/minute max.	400
Blister rows max.	6
Forming cycles/minute max.	80
Die-cutting cycles/minute max.	80
Foil width max., in mm	230
Forming area max., in mm	220 x 158
Forming depth max., in mm	25
Forming foil reel diameter max., in mm	700
Lidding foil reel diameter max., in mm	300
Machine dimensions (L x W x H), in mm	4,600 x 1,000 x 2,200
Weight, in kg	2,200
